Awami Preview B - Announcement

We are happy to announce the release of Awami Preview B version 0.900. These fonts are the result of initial efforts to use OpenType (rather than Graphite) to render the Nastaliq style, including fixing collisions and performing kerning in a way that properly reflects the Nastaliq tradition.

PLEASE NOTE: this is a “preview” release. We believe the font is in fairly good shape and close to a full release. However, we are sure there are still some bugs and infelicities. It will not be difficult to find collisions even in Urdu text. We invite you to try out the font with other languages as well and report any bugs or collisions.

All feedback should be submitted by Friday, 15 January 2027! You can submit a new issue on the Awami Github repo.

Changes in this version

New

- Characters added:
  - U+0682 ARABIC LETTER HAH WITH TWO DOTS VERTICAL ABOVE
  - U+06A8 ARABIC LETTER QAF WITH THREE DOTS ABOVE
  - U+0754 ARABIC LETTER BEH WITH TWO DOTS BELOW AND DOT ABOVE
  - U+088F ARABIC LETTER NOON WITH RING ABOVE
  - U+FD4F ARABIC LIGATURE RAHIMAHUM ALLAAH
  - U+FDFF ARABIC LIGATURE AZZA WA JALL
- Added features:
  - cv43 Lam-V alternate
  - cv55 Arabic-style hamza
  - cv56 High-hamza alternate
  - cv85 Full-stop alternate
  - cv86 Arabic- or Latin-style punctuation
- Added language support for Kashmiri and Malay
- Added 4 weights: Medium, SemiBold, Bold, and ExtraBold
- Implemented short finals
- Implemented mirroring
- Implemented Allah ligature
- Implemented subtending marks

Improved

- Improved kerning
- Fixed collisions reported during the TechPre cycle

Known issues

- At this point we have had very limited success using the font in MS Word. It appears that there are bugs in Word's rendering engine that are preventing the font from working.

Both desktop and web fonts are provided in a single, all-platforms package on the Download Page.
